AWS Deployment + Week 11 Test Cases

MIS 3371 Transaction Processing Systems | Section 10129 | Group 14

Prepared by	Sophia Musetti
Team members	Austin Tran Nguyen, Arya Nair, Benjamin Nguyen, Shayaan M. Dawra, Agah Duzenli
Application URL	https://main.d2kb3xv6llewil.amplifyapp.com
Backend	AWS Lambda behind an API Gateway HTTP API (POST /api/trades and GET /api/trades/{transactionId}). Accepted trades are saved in a DynamoDB table. Frontend hosted on AWS Amplify.
Date tested	November 4, 2026 (on the deployed Amplify site)	Tested by: Austin Tran Nguyen

Before you start

Starting account. Every test starts from the same account: AAPL price $185.50, cash $10,000.00, and 10 AAPL shares. The Lambda uses these fixed values, so results do not change between tests.

Saving. Each accepted trade is saved to DynamoDB and gets a new unique confirmation number, so the number you see will differ from the sample in the results column. The account used for the rules stays fixed (the trades are saved but do not change the balance), so every test starts from the same state. To start fresh, reload the page. If the page does not show the starting values, clear the site's localStorage (DevTools > Application > Local Storage > Clear) and reload.

Message wording is exact. Form errors read: Enter a whole number of 1 or more. Backend rejections start with Trade rejected: (for example, Trade rejected: Insufficient cash.). Accepted trades show a green panel: Your trade was successfully saved! Confirmation Number: followed by the ID. Lookup messages are: Trade retrieved successfully! or Trade not found.

Test cases

Result: 13 of 13 test cases passed.

ID	Test	Input	Steps	Expected Result	Actual Result	Result
TC-01	**Valid Buy**	AAPL, Buy, quantity 1	1. Go to the Application URL and open /trade.html?symbol=AAPL 2. Make sure Buy is selected. 3. Enter 1 in Shares. 4. Click Place Buy order.	A green panel shows: Your trade was successfully saved! Confirmation Number: [a unique ID]. The View Status box is filled with that ID.	Panel showed: Your trade was successfully saved! Confirmation Number: [unique ID, e.g. 3972524d-3af7-404d-8f70-0a056b2a6e91]. View Status box was pre-filled with it.	PASS

ID	Test	Input	Steps	Expected Result	Actual Result	Result
TC-02	**Valid Sell**	AAPL, Sell, quantity 1 (owns 10)	1. Go to the Application URL and open /trade.html?symbol=AAPL 2. Click Sell. 3. Enter 1 in Shares. 4. Click Place Sell order.	A green panel shows: Your trade was successfully saved! Confirmation Number: [a unique ID]. The View Status box is filled with that ID.	Panel showed: Your trade was successfully saved! Confirmation Number: [unique ID, e.g. 3972524d-3af7-404d-8f70-0a056b2a6e91]. View Status box was pre-filled with it.	PASS
TC-03	**Buy more than cash allows (BR-4)**	AAPL, Buy, quantity 54 (54 x $185.50 = $10,017.00; cash is $10,000.00)	1. Go to the Application URL and open /trade.html?symbol=AAPL 2. Make sure Buy is selected. 3. Enter 54 in Shares. 4. Click Place Buy order.	Trade rejected: Insufficient cash.	Trade rejected: Insufficient cash.	PASS
TC-04	**Sell more than owned (BR-5)**	AAPL, Sell, quantity 11 (owns 10)	1. Go to the Application URL and open /trade.html?symbol=AAPL 2. Click Sell. 3. Enter 11 in Shares. 4. Click Place Sell order.	Trade rejected: Insufficient shares.	Trade rejected: Insufficient shares.	PASS
TC-05	**Quantity of zero (BR-3)**	AAPL, Buy, quantity 0	1. Go to the Application URL and open /trade.html?symbol=AAPL 2. Enter 0 in Shares. 3. Click Place Buy order.	Enter a whole number of 1 or more. (shown under the Shares box; the request is not sent)	Enter a whole number of 1 or more. (shown under the Shares box; no request sent)	PASS
TC-06	**Fractional quantity (BR-3)**	AAPL, Buy, quantity 0.5	1. Go to the Application URL and open /trade.html?symbol=AAPL 2. Enter 0.5 in Shares. 3. Click Place Buy order.	Enter a whole number of 1 or more. (shown under the Shares box; the request is not sent)	Enter a whole number of 1 or more. (shown under the Shares box; no request sent)	PASS
TC-07	**Buy boundary: most shares affordable**	AAPL, Buy, quantity 53 (53 x $185.50 = $9,831.50)	1. Go to the Application URL and open /trade.html?symbol=AAPL 2. Make sure Buy is selected. 3. Enter 53 in Shares. 4. Click Place Buy order.	A green panel shows: Your trade was successfully saved! Confirmation Number: [a unique ID]. The View Status box is filled with that ID.	Panel showed: Your trade was successfully saved! Confirmation Number: [unique ID, e.g. 3972524d-3af7-404d-8f70-0a056b2a6e91]. View Status box was pre-filled with it.	PASS

ID	Test	Input	Steps	Expected Result	Actual Result	Result
TC-08	**Sell boundary: sell every share owned**	AAPL, Sell, quantity 10 (owns 10)	1. Go to the Application URL and open /trade.html?symbol=AAPL 2. Click Sell. 3. Enter 10 in Shares. 4. Click Place Sell order.	A green panel shows: Your trade was successfully saved! Confirmation Number: [a unique ID]. The View Status box is filled with that ID.	Panel showed: Your trade was successfully saved! Confirmation Number: [unique ID, e.g. 3972524d-3af7-404d-8f70-0a056b2a6e91]. View Status box was pre-filled with it.	PASS
TC-09	**Unsupported stock symbol (BR-2)**	Symbol XYZ	1. Open https://main.d2kb3xv6llewil.amplifyapp.com/trade.html?symbol=XYZ	The page shows the heading Stock not found and the text XYZ isn't available. The order form is not shown.	Stock not found page shown: XYZ isn't available. The order form is not shown.	PASS
TC-10	**Market orders only (BR-9)**	AAPL, order type	1. Go to the Application URL and open /trade.html?symbol=AAPL 2. Look at the Order type line in the order panel. 3. Look for any Limit option.	Order type shows Market (with the price). There is no Limit option anywhere on the page.	Order type line reads: Market · $185.50. No Limit option exists on the page.	PASS
TC-11	**View Status for a saved trade (Week 11)**	The confirmation number from a trade you just saved (use TC-01)	1. Go to the Application URL and open /trade.html?symbol=AAPL 2. Enter 1 in Shares and click Place Buy order. 3. Wait for the green confirmation panel; the View Status box is filled in for you. 4. Click View Status.	Trade retrieved successfully! Details list the same Confirmation Number, Status: Accepted, Stock Symbol: AAPL, Trade Type: Buy, Shares: 1, and the Submitted time.	Trade retrieved successfully! Details showed the same Confirmation Number, Status Accepted, Stock Symbol AAPL, Trade Type Buy, Shares 1, and the Submitted time (2026-11-04T18:55:29.108Z).	PASS
TC-12	**View Status for an ID that does not exist (404)**	11111111-1111-4111-8111-111111111111	1. Go to the Application URL and open /trade.html?symbol=AAPL 2. In the View Trade Status box, clear the field and type 11111111-1111-4111-8111-111111111111. 3. Click View Status.	Trade not found. No trade details are shown.	Trade not found. The details box stayed hidden.	PASS
TC-13	**View Status for a badly formed ID**	not-a-real-id	1. Go to the Application URL and open /trade.html?symbol=AAPL 2. In the View Trade Status box, clear the field and type not-a-real-id. 3. Click View Status.	Trade not found. No trade details are shown.	Trade not found. The details box stayed hidden.	PASS

How the actual results were recorded

Each case was run by entering the values above on the deployed trade page in Google Chrome (driven by an automated headless Chrome script) and reading the message shown on the page. The page sent each order to the Lambda validation code through API Gateway; accepted trades were saved to DynamoDB and TC-11 to TC-13 read them back with GET /api/trades/{transactionId}. The validation rules were also checked directly against the API with the script lambda/tests/test-lambda.js, which compares the HTTP status code, the status, and the message for each case.
